76,63%	69,49%	1,2 days	1,3 days

Explanations:

Cases = C
Death(s) = D
Created (t): Date when the report was generated (referenced as t)
t - n: Report generation day minus n days
New Cases: Compared to the day before
New Death: Compared to the day before
Growth Rate: Groth rate compared to the day before in percent
Time to double: The time it takes until the actual cases/deathes are doubled in days
Recovered: Not used because this is not an official and countable number
CFR: Case Fatality Rate (letality). Not used because this can be computed only AFTER a pandemic. Actual not a serious number.

Explanations:

Cases = C
Death(s) = D
Created (t): Date when the report was generated (referenced as t)
t - n: Report generation day minus n days
New Cases: Compared to the day before
New Death: Compared to the day before
Growth Rate: Groth rate compared to the day before in percent
Time to double: The time it takes until the actual cases/deathes are doubled in days
Recovered: Not used because this is not an official and countable number
CFR: Case Fatality Rate (letality). Not used because this can be computed only AFTER a pandemic. Actual not a serious number.

Explanations:

Cases = C
Death(s) = D
Created (t): Date when the report was generated (referenced as t)
t - n: Report generation day minus n days
New Cases: Compared to the day before
New Death: Compared to the day before
Growth Rate: Groth rate compared to the day before in percent
Time to double: The time it takes until the actual cases/deathes are doubled in days
Recovered: Not used because this is not an official and countable number
CFR: Case Fatality Rate (letality). Not used because this can be computed only AFTER a pandemic. Actual not a serious number.
